

AIR POLLUTION CONTROL CONSTRUCTION PERMIT

EI FACILITY NO: 341158070

CONSTRUCTION PERMIT NO.: 14-RSG-142

TYPE: Construction permit for the whole facility

In compliance with the provisions of Chapter 285, Wis. Stats., and Chapters NR 400 to NR 499, Wis. Adm. Code,

Name of Source: CLCM - St. Francis

Street Address: 3950 South Pennsylvania Avenue,
Saint Francis, Milwaukee County, Wisconsin

Responsible Official, & Title: Mark Furgason, Site Manager

is authorized to construct and initially operate a paint booth and several other sources related to drum reclamation described in the plans and specifications dated August 11, 2014 (application received), August 14, 20, 22, 2014 (additional information submitted), December 5, 8, 22, 29, 2014 (additional information submitted), January 13, 2015 (additional information submitted), February 19 and 25, 2015 (elected changes during public comment period), March 5, 2015 (elected methylene chloride solvent usage limit) in conformity with the conditions herein. The authority to construct, modify, replace and/or reconstruct any process covered in this Construction Permit expires eighteen (18) months from the date of issuance. This approved period to construct, modify, replace and/or reconstruct may be extended for up to 18 months upon request for cause, prior to expiration, unless otherwise specified by this construction permit. The conditions of this construction permit are permanent and may only be revised through a revision of the construction permit or through the issuance of a new construction permit. [s. 285.60(1), Wis. Stats.]

Conditions of the construction permit marked with an asterisk (*) have been created outside of the Wisconsin's federally approved State Implementation Plan (SIP) and are not federally enforceable.

This authorization requires compliance by the permit holder with the emission limitations, monitoring requirements and other terms and conditions set forth in Parts I and II hereof.

Dated at Milwaukee, Wisconsin

March 9, 2015

STATE OF WISCONSIN
DEPARTMENT OF NATURAL RESOURCES
For the Secretary

By /s/ Daniel Schramm

Daniel H. Schramm
Air Management Supervisor
Milwaukee Service Center

Part I

A. Process P44, Stack(s) <none> – Label Stripping		
1. Volatile Organic Compounds.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) Latest Available Control Technology (LACT) applies to this process. LACT is determined to be:</p> <p>(a) VOC content of solvent solution(s) used in P44 may not exceed 1.52 pounds per gallon; and</p> <p>(b) Amount of VOC containing solvents used in P44 may not exceed 19.0 gallons per month, averaged over any 12 consecutive calendar month period.</p> <p>(c) good operating practices.</p> <p>[s. NR 424.03(2)(c), Wis. Adm. Code (permit 14-RSG-142)]</p> <p>Note: The above condition restricts potential VOC emissions from P44 to ~ 1.73 tons per year. There is no usage restriction for solvents containing no VOCs (e.g. acetone – acetone is not a VOC).</p> <p>(2) Good operating practices required in condition (1)(c) above shall include all of the following:</p> <p>(a) Immediately after use, place all rags, or any other porous material used to apply solvent, in a covered container (labeled as waste solvent), and handled in accordance with local, state and federal regulations.</p> <p>(b) Store waste solvent only in covered</p>	<p>(1) Within 15 days after each month, the permittee shall determine and record the following:</p> <p>(a) the quantity (in gallons) and identity of each solvent used during the month;</p> <p>(b) the amount of all VOC containing solvents used (in gallons) during the month;</p> <p>(c) the amount of all VOC containing solvents used (in gallons/month), averaged over any 12 consecutive calendar month period.</p> <p>[s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]</p>	<p>(1) The permittee shall keep records describing the good operating practices being implemented for these processes.</p> <p>[ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code]</p> <p>(2) The permittee shall collect and record the following information:</p> <p>(a) A unique name or identification number for each solvent, as applied.</p> <p>(b) The VOC content of each solvent (in pounds per gallon), as applied. Record 0 lb/gallon for any solvent used in P44 that does not contain any VOCs.</p> <p>(c) MSDS or equivalent document for each solvent which contains information to determine VOC content (or lack of VOC) of the solvent.</p> <p>[s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code, s. NR 439.04(5)(d)1, Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(3) The permittee shall keep records required in condition I.A.1.b.(1).</p> <p>[ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code (permit 14-RSG-142)]</p>

A. Process P44, Stack(s) <none> – Label Stripping		
containers labeled as waste solvent and handled in accordance with local, state and federal regulations.		
(c) Follow operating procedures which prevent solvent from dripping from the applicator during solvent application.		
[ss. NR 424.03(2)(c), and NR 407.09(4)(a)3.b., Wis. Adm. Code , s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]		
(3) See condition I.ZZZ.1.a.(1)		

Notes: (1) P44 currently uses a solvent that contains 8.59 lb/gal methylene chloride and 1.52 lb/gal VOC [Ref: permit application]. Condition I.ZZZ.1.b.(1) of this permit restricts methylene chloride containing solvent usage in P44 to 140 gal/month on a 12-month rolling average basis. Because the solvents currently used in P44 contain methylene chloride (not a VOC) and VOCs, effective VOC containing solvent usage limit is 140 gallons (< 190 gallons) per month averaged over any 12 consecutive month period. With a VOC content limit of 1.52 lb/gal, and VOC solvent usage limit of 190 gallons per month (on a 12-month rolling average), potential VOC emissions from P44 are 288.8 pounds per month on a 12-month rolling average basis.

(2) The permit has a VOC emission limit of 4,000 pounds per month (averaged over any 12 consecutive months) for P44 and P45 combined in condition I.ZZZ.1.a.(4).

A. Process P44, Stack(s) <none> – Label Stripping	
2. Hazardous Air Pollutants.	
a. Conditions	
(1) See section I.ZZZ.1. for federal HAP emission restrictions for the facility to be a synthetic minor (area) source for federal HAPs.	
Note: The source submitted information to indicate that the indoor methylene chloride emissions are exempt (as per s. NR 445.07(5)(d)2., Wis. Adm. Code) from requirements under s. NR 445.07, Wis. Adm. Code.	

<p>B. Process P80A, Control C10, Stack S98 – Interior Caustic Preflush (steel drums, plastic drums/containers) Process P80B, Control C10, Stack S98 – Exterior Wash/Soaker (plastic drums/containers) Process P80C, Control C10, Stack S98 – Exterior Rinse (plastic drums/containers) Process P42, Control C10, Stack S98 – Internal Drum Washer (plastic drums/containers) Process P95, Control C10, Stack S98 – Drum-Caustic Pre-Flush (plastic drums/containers) Process P72, Control C10, Stack S98 – Exterior Wash/Soaker (steel drums) Process P73, Control C10, Stack S98 – Exterior Rinse (steel drums) Process P74, Control C10, Stack S98 – Internal Double Split Washer (steel drums)</p>		
1. Sodium Hydroxide (NaOH) Emissions.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) The permittee may not cause, allow or permit emissions in such quantity or concentration or for such duration as to cause an ambient concentration of sodium hydroxide off the source property that exceeds 200 micrograms per cubic meter (per 1 hour). [s. NR 445.07(1)(a), Wis. Adm. Code (permit 14-RSG-142)]</p>	<p>(1) Emissions shall be controlled by a wet scrubber (C10) equipped with a demister (mist eliminator) prior to exhausting via stack S98. [s. 285.65(3), Wis. Stats., s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2) The permittee shall maintain:</p> <p>(a) the pressure drop across the scrubber and demister within the pressure drop range (in inches of water column) recommended by the manufacturer or within a range approved by the Department;</p> <p>(b) the liquor flow rate through the scrubber at the flow rate (in gallons per minute) recommended by the manufacturer or at a rate approved by the Department.</p> <p>(c) the scrubber liquid pH between the range 5 to 9 by adding either NaOH or HCl as needed.</p> <p>[ss. NR 439.055(1)(e), and NR 407.09(4)(a), Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]</p> <p>(3) The permittee shall perform periodic internal inspections of the wet scrubber to ensure that the control equipment is operating properly. The time interval between inspections may not exceed twelve (12) months. These inspections shall include, but not be limited to inspections and maintenance/repair (as necessary) of:</p>	<p>(1) Whenever emission testing is required to demonstrate compliance, the permittee shall use methods and plans approved, in writing, by the Department to determine NaOH emission rate or concentration. [s. NR 439.06(8), Wis. Adm. Code, s. 285.65(3), Wis. Stats.]</p> <p>(2) The permittee shall measure and record the following parameters once for every 8 hours of source operation or once per day, whichever yields the greater number of measurements:</p> <p>(a) the pressure drop across the scrubber and demister;</p> <p>(b) the liquor flow rate through the scrubber.</p> <p>[ss. NR 439.055(2)(b), and NR 407.09(4)(a), Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]</p> <p>(3) The permittee shall keep records of:</p> <p>(a) the date, time, and initials of the person performing the required periodic inspections;</p> <p>(b) a list of the items inspected; and</p> <p>(c) any maintenance or repairs performed as a result</p>

B. Process P80A, Control C10, Stack S98 – Interior Caustic Preflush (steel drums, plastic drums/containers) Process P80B, Control C10, Stack S98 – Exterior Wash/Soaker (plastic drums/containers) Process P80C, Control C10, Stack S98 – Exterior Rinse (plastic drums/containers) Process P42, Control C10, Stack S98 – Internal Drum Washer (plastic drums/containers) Process P95, Control C10, Stack S98 – Drum-Caustic Pre-Flush (plastic drums/containers) Process P72, Control C10, Stack S98 – Exterior Wash/Soaker (steel drums) Process P73, Control C10, Stack S98 – Exterior Rinse (steel drums) Process P74, Control C10, Stack S98 – Internal Double Split Washer (steel drums)		
	(a) the spray nozzle(s) for signs of corrosion and plugging; (b) inlet and outlet ducts for plugging and leaks; (c) the pumping system, suction pipe, and pumping system valves; & (d) the mist eliminator for signs of corrosion and plugging. [s. 285.65(3), Wis. Stats., s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]	of these inspections. [ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14 - RSG-142)]

Note: S98 is a vertical unobstructed stack with a stack height of 43 feet.

B. Process P80A, Control C10, Stack S98 – Interior Caustic Preflush (steel drums, plastic drums/containers) Process P80B, Control C10, Stack S98 – Exterior Wash/Soaker (plastic drums/containers) Process P80C, Control C10, Stack S98 – Exterior Rinse (plastic drums/containers) Process P42, Control C10, Stack S98 – Internal Drum Washer (plastic drums/containers) Process P95, Control C10, Stack S98 – Drum-Caustic Pre-Flush (plastic drums/containers) Process P72, Control C10, Stack S98 – Exterior Wash/Soaker (steel drums) Process P73, Control C10, Stack S98 – Exterior Rinse (steel drums) Process P74, Control C10, Stack S98 – Internal Double Split Washer (steel drums)		
2. Visible Emissions.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
(1) Number 1 of the Ringlemann chart or 20% opacity. [s. NR 431.05 , Wis. Adm. Code (permit 14-RSG-142)]	(1) The compliance demonstration requirements for sodium hydroxide emissions shall also serve as a compliance demonstration method for visible emissions. [s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]	(1) Whenever visible emission testing is required to demonstrate compliance, the permittee shall use U.S. EPA Method 9 or another test method approved by the Department in writing. [ss. NR 407.09(1)(c)1.a., and NR 439.06(9)(a)1., Wis. Adm. Code] (2) The recordkeeping and monitoring requirements in I.B.1.c.(2) & (3) will also serve to demonstrate compliance for visible emissions. [s. NR 407.09(4)(a), Wis. Adm. Code]

- C. Process P12, Control C10, Stack(s) S92, S98 – Water Heater 4 (2.0 MMBtu/hr Natural Gas Fired)
 Process P13, Control C10, Stack(s) S93, S98 – Oil/Water Heater 3 (2.0 MMBtu/hr Natural Gas Fired)
 Process P14, Control C10, Stack(s) S94, S98 – Caustic Heater 2 (3.6 MMBtu/hr Natural Gas Fired)
 Process P15, Control C10, Stack(s) S95, S98 – Caustic Heater 1 and 2,000 gallon tank (2.0 MMBtu/hr Natural Gas Fired)
 Process P42C, Control <none>, Stack S62 – Hot Water Heater (1.75 MMBtu/hr Natural Gas Fired)
 Process P41, Control C10, Stacks(s) S96, S98 – Drying Oven/Flamer (0.6 MMBtu/hr Natural Gas Fired)

Note: Natural gas combustion products from P12, P13, P14, P15, P42C, and P41 are exhausted via stacks S92, S93, S94, S95, S62 and S96, respectively. Only Mists/vapors generated from the processes are sent to the scrubber.

1. Particulate Matter Emissions.

a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) For each stack S92, S93, S94, S95, S62, S96: Particulate matter emissions may not exceed 0.15 pounds of particulate matter per million Btu heat input. [s. NR 415.06(2)(a), Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2)(a) Height of each stack S92, S93, S94, S95 shall be at least 25 feet above ground level.</p> <p>(b) Height of each stack S62 and S96 shall be at least 28 feet above ground level.</p> <p>[s. NR 404.08(2), Wis. Adm. Code, ss. 285.65(3), (7), Wis. Stats. (permit 14 -RSG-142)]</p> <p>Note: The above stack height conditions are included so that the facility-wide modeled PM_{2.5} – 24 hr concentration (facility impact + background conc.) does not exceed the ambient air quality (24 -hr) standard for PM_{2.5}. Stacks S62, S92, S93, S94, and S95 have rain hats. Exhaust from S96 is passive (modeled as if S96 has a rain hat).</p>	<p>(1) Only natural gas shall be combusted in the heaters and in the oven. [s. 285.65(3), Wis. Stats., s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]</p>	<p>(1) Whenever particulate matter emission testing is required to demonstrate compliance, the permittee shall use U.S. EPA Method 5, or 17 including condensable backhalf emissions (U.S. EPA Method 202) or an other test method approved by the Department in writing. [ss. NR 439.06(1), NR 439.07(8)(b)7., and NR 407.09(1)(c)1. a., Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2) The permittee shall keep monthly records of type(s) of fuel used in each process. [ss. NR 439.04(1)(d), and NR 407.09(4)(a)1., Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(3) The permittee shall keep and maintain onsite technical drawings, blueprints or equivalent records of the physical stack parameters. [s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code (permit 14-RSG-142)]</p>

C. Process P12, Control C10, Stack(s) S92, S98 – Water Heater 4 (2.0 MMBtu/hr Natural Gas Fired) Process P13, Control C10, Stack(s) S93, S98 – Oil/Water Heater 3 (2.0 MMBtu/hr Natural Gas Fired) Process P14, Control C10, Stack(s) S94, S98 – Caustic Heater 2 (3.6 MMBtu/hr Natural Gas Fired) Process P15, Control C10, Stack(s) S95, S98 – Caustic Heater 1 and 2,000 gallon tank (2.0 MMBtu/hr Natural Gas Fired) Process P42C, Control <none>, Stack S62 – Hot Water Heater (1.75 MMBtu/hr Natural Gas Fired) Process P41, Control C10, Stacks(s) S96, S98 – Drying Oven/Flamer (0.6 MMBtu/hr Natural Gas Fired)		
2. Visible Emissions.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
(1) Number 1 of the Ringlemann chart or 20% opacity. [s. NR 431.05, Wis. Adm. Code (permit 14 - RSG-142)]	(1) Only natural gas shall be combusted in the heaters and in the oven. [s. 285.65(3), Wis. Stats., s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]	(1) Whenever visible emission testing is required to demonstrate compliance, the permittee shall use U.S. EPA Method 9 or another test method approved by the Department in writing. [ss. NR 407.09(1)(c)1.a. and NR 439.06(9)(a)1., Wis. Adm. Code] (2) The recordkeeping requirements for particulate matter emissions will also serve to demonstrate compliance for visible emissions. [s. NR 407.09(4)(a), Wis. Adm. Code]

D. Process P45, Stack(s) <none> – Plastic Drum Wipe Cleaning		
1. Volatile Organic Compounds.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) Latest Available Control Technology (LACT) applies to this process. LACT is determined to be:</p> <p>(a) VOC content of solvent solution(s) used in P45 may not exceed 0.42 pounds per gallon;</p> <p>(b) Amount of VOC containing solvent usage may not exceed 2,000 gallons per month, averaged over any 12 consecutive calendar month period.; and</p> <p>(c) good operating practices.</p> <p>[s. NR 424.03(2)(c), Wis. Adm. Code (permit 14-RSG-142)]</p> <p>Note: The above condition restricts potential VOC emissions from P44 to 5.04 tons per year. There is no usage restriction for solvents containing no VOCs (e.g. acetone – acetone is not a VOC).</p> <p>(2) Good operating practices required in condition (1)(c) above shall include all of the following:</p> <p>(a) Immediately after use, place all rags, or any other porous material used to apply solvent, in a covered container (labeled as waste solvent), and handled in accordance with local, state and federal regulations.</p> <p>(b) Store waste solvent only in covered</p>	<p>(1) Within 15 days after each month, the permittee shall determine and record the following:</p> <p>(a) the quantity (in gallons) and identity of each solvent used during the month;</p> <p>(b) the amount of all VOC containing solvents used (in gallons) during the month;</p> <p>(c) the amount of all VOC containing solvents used (in gallons/month), averaged over any 12 consecutive calendar month period.</p> <p>[s. 285.65(3), Wis. Stats. (permit 14 -RSG-142)] [see Note (2)]</p>	<p>(1) The permittee shall keep records describing the good operating practices being implemented for these processes.</p> <p>[ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2) The permittee shall collect and record the following information:</p> <p>(a) A unique name or identification number for each solvent, as applied.</p> <p>(b) The VOC content of each solvent (in pounds per gallon), as applied. Record 0 lb/gallon for any solvent used in P45 that does not contain any VOCs.</p> <p>(c) MSDS or equivalent document for each solvent which contains information to determine VOC content of the solvent.</p> <p>[s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code, s. NR 439.04(5)(d)1, Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(3) The permittee shall keep records required in condition I.D.1.b.(1).</p> <p>[ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code (permit 14-RSG-142)]</p>

D. Process P45, Stack(s) <none> – Plastic Drum Wipe Cleaning		
containers labeled as waste solvent and handled in accordance with local, state and federal regulations. (c) Follow operating procedures which prevent solvent from dripping from the applicator during solvent application. [ss. NR 424.03(2)(c), and NR 407.09(4)(a)3.b., Wis. Adm. Code , s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]		
(3) See condition I.ZZZ.1.a.(1)		

Notes:(1) P45 currently uses acetone (which is not a VOC) as the solvent. Permit application requests flexibility to use VOC containing solvents.

(2) The permit contains an elected VOC emission limit of 4,000 pounds per month (averaged over any 12 consecutive months) for P44 and P45 combined in condition I.ZZZ.1.a.(4) .

D. Process P45, Stack(s) <none> – Plastic Drum Wipe Cleaning	
2. Hazardous Air Pollutants.	
a. Conditions	
<p>(1) The permittee shall not use HAP-containing solvent in Process P45. [s. 285.65(7), Wis. Stats. (permit 14-RSG-142)]</p> <p>(2) The permittee shall collect and record the following information for Process P45:</p> <p>(a) A unique name or identification number for each solvent, as applied.</p> <p>(b) The HAP content of each solvent (in pounds per gallon), as applied.</p> <p>(c) MSDS or equivalent document for each solvent which contains information to determine HAP content of the solvent or lack of HAP in the solvent.</p> <p>[s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code, s. NR 439.04(5)(d)1, Wis. Adm. Code (permit 14-RSG-142)]</p>	

E. Process P71, Stack(s) <none> – Steel Drum Delabeling		
1. Volatile Organic Compounds.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) Solvents used in P71 shall not contain volatile organic compounds (VOCs).</p> <p>[s. 285.65(7), Wis. Stats. (permit 14-RSG-142)]</p>	<p>(1) Within 15 days after each month, the permittee shall determine and record the following:</p> <p>(a) the identity and the quantity of each solvent used during the month (in gallons).</p> <p>[s. 285.65(3), Wis. Stats. (permit 14 - RSG-142)]</p>	<p>(1) The permittee shall collect and record the following information:</p> <p>(a) A unique name or identification number for each solvent, as applied.</p> <p>(b) The VOC content of each solvent (in pounds per gallon), as applied. Record 0 lb/gallon for any solvent used in P71 that does not contain any VOCs.</p> <p>(c) MSDS or equivalent document for each solvent which contains information to determine VOC content (or lack of VOCs) of the solvent.</p> <p>[s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code, s. NR 439.04(5)(d)1, Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2) The permittee shall keep records required in condition I.E.1.b.(1).</p> <p>[ss. NR 439.04(1)(d), and NR 407.09(4)(a), Wis. Adm. Code (permit 14-RSG-142)]</p>

Notes: (1) The condition I.E.1.a.(1) avoids P71 being subject to s. NR 423.03(7), Wis. Adm. Code. The condition I.E.1.a.(1) [along with elected VOC content/usage limitations in P44, P45, P32C] results in facility-wide potential VOC emissions being less than 79 TPY.

E. Process P71, Stack(s) <none> – Steel Drum Delabeling		
2. Hazardous Air Pollutants.		
a. Conditions		
<p>(1) The permittee shall not use HAP-containing solvent in Process P71. [s. 285.65(7), Wis. Stats. (permit 14-RSG-142)]</p> <p>(2) The permittee shall collect and record the following information for Process P71:</p> <p>(a) A unique name or identification number for each solvent, as applied.</p> <p>(b) The HAP content of each solvent (in pounds per gallon), as applied.</p> <p>(c) MSDS or equivalent document for each solvent which contains information to determine HAP content of the solvent or lack of HAP in the solvent.</p> <p>[s. 285.65(3), Wis. Stats., s. NR 439.04(1)(d), Wis. Adm. Code, s. NR 439.04(5)(d)1, Wis. Adm. Code (permit 14-RSG-142)]</p>		

F. Process P75; Control C70 (Acid Scrubber), C10; Stack S98 – Acidizer		
1. Hydrochloric Acid.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
<p>(1) The permittee may not cause, allow or permit emissions in such quantity or concentration or for such duration as to cause an ambient concentration of hydrochloric acid off the source property that exceeds 746 micrograms per cubic meter (1 hour) or 20 micrograms per cubic meter (annual). [s. NR 445.07(1)(a), Wis. Adm. Code (permit 14-RSG-142)]</p>	<p>(1) Emissions from P75 shall be controlled by an acid scrubber (C70) followed by wet scrubber C10. [ss. 285.65(3),(7), Wis. Stats., s. NR 407.09(4)(a)3.b., Wis. Adm. Code (permit 14-RSG-142)]</p> <p>(2) The permittee shall maintain:</p> <p>(a) the pressure drop across the acid scrubber within the pressure drop range (in inches of water column) recommended by the manufacturer or within a range approved by the Department;</p> <p>(b) the liquor flow rate through the acid scrubber at the flow rate (in gallons per minute) recommended by the manufacturer or at a rate approved by the Department. [ss. NR 439.055(1)(e), and NR 407.09(4)(a), Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]</p> <p>(3) See requirements for wet scrubber C10 in section I.B of this permit.</p>	<p>(1) The permittee shall measure and record the following parameters once for every 8 hours of source operation or once per day, whichever yields the greater number of measurements:</p> <p>(a) the pressure drop across the acid scrubber;</p> <p>(b) the liquor flow rate through the acid scrubber. [ss. NR 439.055(2)(b), and NR 407.09(4)(a), Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]</p> <p>(2) See requirements for wet scrubber C10 in section I.B of this permit.</p>

4. HAP Emissions.		
a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
(1) The permittee shall meet all applicable requirements in section I.H (National Emission Standards for Hazardous Air Pollutants: Surface Coating of Miscellaneous Metal Parts and Products) of this permit. [Subchapter V of s. NR 465, Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]	(1) The permittee shall comply with all applicable compliance demonstration requirements in section I.H (National Emission Standards for Hazardous Air Pollutants: Surface Coating of Miscellaneous Metal Parts and Products) of this permit. [Subchapter V of s. NR 465, Wis. Adm. Code, s. NR 407.09(4)(a)3.b., Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]	(1) The permittee shall meet all applicable requirements in section I.H (National Emission Standards for Hazardous Air Pollutants: Surface Coating of Miscellaneous Metal Parts and Products) of this permit. [Subchapter V of s. NR 465, Wis. Adm. Code, s. NR 407.09(4)(a) , Wis. Adm. Code, s. 285.65(3), Wis. Stats. (permit 14-RSG-142)]

H. National Emission Standards for Hazardous Air Pollutants (NESHAP): Surface Coating of Miscellaneous Metal Parts and Products [Chapter NR 465, Subchapter V, Wisconsin Administrative Code, and 40 CFR 63, Subpart Mmmm]
1. Condition Type: Emission Limits
<p>a. Conditions:</p> <p>(1) For the general use coating affected source, limit organic HAP emissions to no more than 0.31 kg of organic HAP per liter (2.6 lb/gallon) of coating solids used during each 12-month compliance period.</p> <p>[s. NR 465.43(1)(b)1., Wis. Adm. Code, 40 CFR §63.3890(b)(1), s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p> <p>(2) The facility's miscellaneous metal parts and products coating operations falls under only the general use coating sub-category of the NESHAP. Therefore, emission limits applicable for other coating sub-categories (viz. high performance coating, magnet wire coating, rubber-to-metal coatings, and extreme performance fluoropolymer coatings) are not included in this permit. NESHAP requirements included in this permit pertain to general use coating sub-category only. If facility operations fall under one or more of the other coating sub-categories, permittee shall comply with all applicable emission limits and requirements in subchapter V of s. NR 465, Wis. Adm. Code.</p> <p>[Subchapter V of s. NR 465, Wis. Adm. Code, 40 CFR part 63, subpart Mmmm, ss. 285.65(3),(13), Wis. Stats. (permit 14-RSG-142)]</p> <p>(3) The affected source is the collection of all of the items listed in (a) to (d) below that are used for surface coating of miscellaneous metal parts and products within each* sub-category:</p> <p>(a) All coating operations.</p> <p>(b) All storage containers and mixing vessels in which coatings, thinners and other additives, and cleaning materials are stored or mixed.</p> <p>(c) All manual and automated equipment and containers used for conveying coatings, thinners and other additives, and cleaning materials.</p> <p>(d) All storage containers and all manual and automated equipment and containers used for conveying waste materials generated by a coating operation.</p> <p>*Since all coating operations at the facility are under the general use coating sub-category, there is only one affected source at the facility consisting of applicable items in (2)(a)-(d), above.</p> <p>[s. NR 465.41(3), Wis. Adm. Code, 40 CFR §63.3882(b), s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p>

H. National Emission Standards for Hazardous Air Pollutants (NESHAP): Surface Coating of Miscellaneous Metal Parts and Products [Chapter NR 465, Subchapter V, Wisconsin Administrative Code, and 40 CFR 63, Subpart MMMM]
2. Condition Type: Compliance Options
<p>a. Conditions:</p> <p>(1) You shall include all coatings, thinners and other additives, and cleaning materials used in the affected source when determining whether the organic HAP emission rate is equal to or less than the applicable emission limit in Condition I.H.1.a.(1). To make this determination, you shall use at least one of the compliance options listed in Conditions I.H.2.a.(2) and (3). You may apply any of the compliance options to an individual coating operation, or to multiple coating operations as a group, or to the entire affected source. You may use different compliance options for different coating operations, or at different times on the same coating operation. You may employ different compliance options when different coatings are applied to the same part, or when the same coating is applied to different parts. However, you may not use different compliance options at the same time on the same coating operation. If you switch between compliance options for any coating operation or group of coating operations, you shall document this switch as required by Condition I.H.5.a.(1)(c), and you shall report it in the next semiannual compliance report required in Condition I.H.4. [s. NR 465.43(2), Wis. Adm. Code, 40 CFR 63.3891, s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p> <p>(2) <i>Compliant material option.</i> You shall meet all the requirements of section I.H.4. of this permit to demonstrate compliance with the emission limit in Condition I.H.1.a.(1) using this option. To use this option, you shall demonstrate that the organic HAP content of each coating used in the coating operation or operations is less than or equal to the emission limit in Condition I.H.1.a.(1), and that each thinner and other additive, and cleaning material used contains no organic HAP. [s. NR 465.43(2)(a), Wis. Adm. Code, 40 CFR §63.3891(a), s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p> <p>(3) <i>Emission rate without add-on controls option.</i> You shall meet all the requirements of s. NR 465.47, Wis. Adm. Code to demonstrate compliance with the emission limit in Condition I.H.1.a.(1) using this option. To use this option, you shall demonstrate that, based on the coatings, thinners and other additives, and cleaning materials used in the coating operation or operations, the organic HAP emission rate for the coating operation or operations is less than or equal to the emission limit in Condition I.H.1.a.(1), calculated as a rolling 12-month emission rate and determined on a monthly basis. [s. NR 465.43(2)(b), Wis. Adm. Code, 40 CFR 63.3891(b), s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p> <p>Note: Add-on controls option is not included in this permit as the facility does not use add-on control equipment to demonstrate compliance.</p>

H. National Emission Standards for Hazardous Air Pollutants (NESHAP): Surface Coating of Miscellaneous Metal Parts and Products [Chapter NR 465, Subchapter V, Wisconsin Administrative Code, and 40 CFR 63, Subpart Mmmm]
3. Condition Type: General Compliance Requirements a. Conditions: <p>(1) Any coating operation for which you use the compliant material option or the emission rate without add-on controls option shall be, as specified in s. NR 465.43 (2) (a) and (b), in compliance with the emission limit in Condition I.H.1.a.(1) at all times. [s. NR 465.44(1)(a)1., Wis. Adm. Code; 40 CFR 63.3900(a)(1) , s. 285.65(13), Wis. Stats. (permit 14 -RSG-142)]</p> <p>(2) You shall always operate and maintain your affected source, including all air pollution control and monitoring equipment you use for purposes of complying with this section, according to the provisions in s. NR 460.05 (4) (a)1, Wis. Adm. Code. [s. NR 465.44(1)(b), Wis. Adm. Code, 40 CFR 63.3900(b) , s. 285.65(13), Wis. Stats. (permit 14 -RSG-142)]</p> <p>(3) You shall comply with the applicable general provisions requirements in ch. NR 460, Wis. Adm. Code. Appendix Mmmm in ch. NR 460 shows which parts of the general provisions in ch. NR 460 apply to you.</p> <p>[s. NR 465.44(2), Wis. Adm. Code, 40 CFR 63.3901, s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]</p>

H. National Emission Standards for Hazardous Air Pollutants (NESHAP): Surface Coating of Miscellaneous Metal Parts and Products
[Chapter NR 465, Subchapter V, Wisconsin Administrative Code, and 40 CFR 63, Subpart Mmmm]

4. Condition Type: Compliant Material Option

a. Conditions:

(1) Demonstration of Continuous Compliance with the Emission Limit in I.H.1.a.(1) Using Compliant Material Option

(a) For each compliance period, to demonstrate continuous compliance, you may not use any coating for which the organic HAP content, determined using Equation 1 below, exceed the emission limit in condition I.H.1.a.(1), and you may not use any thinner or other additive, or cleaning material that contains organic HAP, determined according to s. NR 465.46(2)(a), Wis. Adm. Code. A compliance period consists of 12 months. Each month, after the end of the initial compliance period described in s. NR 465.46(1), Wis. Adm. Code, is the end of a compliance period consisting of that month and the preceding 11 months.

$$H_c = [D_c \times W_c] / V_s$$

Where,

H_c is the organic HAP content of the coating, kg (lb) of organic HAP emitted per liter (gallon) of coating solids used;

D_c is the density of coating, kg (lb) of coating per liter (gallon) of coating, determined according to s. NR 465.46(2)(c), Wis. Adm. Code;

W_c is the mass fraction of organic HAP in the coating, kg (lb) of organic HAP per kg (lb) of coating, determined according to s. NR 465.46(2)(a), Wis. Adm. Code;

V_s is the volume fraction of coating solids, liter (gallon) of coating solids per liter (gallon) of coating, determined according to s. NR 465.46(2)(b), Wis. Adm. Code.

(b) If you choose to comply with the emission limit in condition I.H.1.a.(1) by using the compliant material option, the use of any coating, thinner or other additive, or cleaning material that does not meet the criteria specified in paragraph (a) above is a deviation from the emission limit in condition I.H.1.a.(1) that shall be reported as specified in s. NR 465.45(1)(c)6. and (2)(a)5, Wis. Adm. Code.

(c) As part of each semiannual compliance report required by s. NR 465.45(2), you shall identify the coating operations for which you used the compliant material option. If there were no deviations from the applicable emission limit in condition I.H.1.a.(1), submit a statement that the coating operations were in compliance with the emission limits during

H. National Emission Standards for Hazardous Air Pollutants (NESHAP): Surface Coating of Miscellaneous Metal Parts and Products
[Chapter NR 465, Subchapter V, Wisconsin Administrative Code, and 40 CFR 63, Subpart MMMM]

the reporting period because you used no coatings for which the organic HAP content exceeded the emission limit in condition I.H.1.a.(1), and you used no thinner, other additive or cleaning material that contained organic HAP, determined according to s. NR 465.46(2)(a), Wis. Adm. Code.

(d) You shall maintain records as specified in s. NR 465.45(3) and (4), Wis. Adm. Code.

[s. NR 465.46(3), Wis. Adm. Code, 40 CFR 63.3942, s. 285.65(13), Wis. Stats. (permit 14-RSG-142)]

ZZZ. Conditions Applicable to the Entire Facility.

Condition Type	a. Limitations	b. Compliance Demonstration	c. Reference Test Methods, Recordkeeping and Monitoring Requirements
1. Synthetic Minor Limits and Facility Operating Hours Restriction	<p>(1) No person may cause, allow or permit the combined individual monthly average emission of any federal hazardous air pollutant (federal HAP) emitted, as identified in Section 112(b) of the Clean Air Act [42 USC 7412(b)], to exceed 1,250 pounds per month, averaged over any 12 consecutive calendar months.</p> <p>[s. 285.65(7), Wis. Stats. (permit 14 - RSG-142)]</p> <p>(2) No person may cause, allow or permit the combined monthly average emission of all federal hazardous air pollutants (federal HAPs) emitted each month, as identified in Section 112(b) of the Clean Air Act (42 USC 7412(b)), to exceed 4,083 pounds per month, averaged over any 12 consecutive calendar months.</p> <p>[s. 285.65(7), Wis. Stats. (permit 14 - RSG-142)]</p> <p>Note: The above conditions (1) & (2) were elected so that the facility is an area source for federal HAPs and a SM source.</p> <p>(3) VOC emissions from the Processes P44 and P45 combined may not exceed 4,000 pounds per month, averaged over any 12 consecutive month period. [s. 285.65(7), Wis. Stats.
